

RPE

An interactive training course on Respiratory Protective Equipment

This interactive learning course is to make staff aware that respiratory protective equipment is only to be used as a “last resort” and is designed to be used in a contaminated or an oxygen deficient atmosphere to provide the wearer with air that’s safe to breathe.

The course details how to choose RPE that’s suitable for the task, the wearer, and the work environment and is worn correctly by someone who has been trained to use it. The training message is delivered in a positive mode to ensure all trainees are aware of the safety procedures and know where to get information should they be required to. The “Dress for Danger” and “no one works to get hurt” culture is reinforced throughout the course.

The learning design adopted ensures effective engagement of the Learner by continued interaction utilizing screen prompts to guide the trainee through the course and those with little or no computer experience will find it easy to use.

- A cost effective solution to your training and ongoing assessment requirements
- Recorded evidence of training covering safe working practice and legal compliance
- Progress and achievement that is measurable
- Consistent, reinforced auditable training

Having completed the tutorial, a random assessment test is generated and the course records the Learner’s progress providing an auditable trail of results and a certificate of completion can be printed for successful students.

This certificate provides evidence of the underpinning knowledge required prior to completing a workplace assessment to prove competence. This accreditation of prior learning can contribute towards NVQs.

My SafetyNet courses...

- Have the course customized to reflect your company’s corporate identity, site requirements and company SHE policy.
- Delivery of training can be configured to suit individual company IT requirements

Make your Site a Safety Zone - Keep it Safe and Legal

...training for success

Course Elements

When can RPE be used?
What types of RPE exist?
How to assess the requirements.
How to select the RPE.
Storage Training and Maintenance..
Checkpoint Quiz

Other courses in the SafetyNet series:
Working Safely, COSHH, Hazard Identification & Risk Assessment, PPE, RPE, Loading & Unloading, Safety in the Office, DSE, Manual Handling, Handling & Use of Flammable Liquids, Noise & Vibration, Driving Safely, Fire.
