

# Handling & Use of flammable liquids

## An interactive training course on Handling & Use of flammable liquids

This interactive learning course promotes a pro-active approach towards Health & Safety and can be used to help foster and develop this attitude change amongst all staff.

The learning design adopted ensures effective engagement of the Learner by continued interaction utilizing screen prompts to guide the trainee through the course and those with little or no computer experience will find it easy to use.

The course highlights the dangers that fire can cause and delivers a positive fire prevention message to staff to remind them of their responsibilities for ensuring the safety of everyone in the workplace. The “safety is a

state of mind” and “no one works to get hurt” culture is reinforced throughout the course.

- A cost effective solution to your training and ongoing assessment requirements
- Recorded evidence of training covering safe working practice and legal compliance
- Progress and achievement that is measurable
- Consistent, reinforced auditable training

Having completed the tutorial, a random assessment test is generated and the course records the Learner’s progress providing an auditable trail of results and a certificate of completion can be printed for successful students. This certificate provides evidence of the

underpinning knowledge required prior to completing a workplace assessment to prove competence. This accreditation of prior-learning can contribute towards NVQs.

My SafetyNet courses...

- Have the course customized to reflect your company’s corporate identity, site requirements and company SHE policy.
- Delivery of training can be configured to suit individual company IT requirements

Make your Site a Safety Zone - Keep it Safe and Legal

# A cost effective solution to your training.

## Interactive Scenarios

Regardless of the subject matter, all of the learning material that we develop is designed to engage, motivate and challenge the learner through the use of interactive screens which help to improve trainees' knowledge retention.

We are now enhancing the learning environment within our courses by adding course specific interactive scenarios that encourage the learner into interactive play further improving the knowledge transfer.

The courses and modules that we create can be used for standalone or as part of a blended learning approach and much of the materials have been designed with both purposes in mind.

Well designed learning materials can be used in many different scenarios, maximising your investments.

## Course Modules

Module One - Introduction

Module Two - General control measures (VICES)

Module Three - Storage in fixed tanks  
and containers

Module Four - Loading and unloading of  
road tankers

Module Five - Coatings manufacture

Module Six - Cleaning plant and equipment

Module Seven - Maintenance and modification

Module Eight - Spillages

Module Nine - Emergency

Module Ten - Zoning

Ignition  
Static

Other courses in the safetynet series:

Working Safely, COSHH, Hazard Identification & Risk Assessment, PPE, RPE, Loading & Unloading, Safety in the Office, DSE, Manual Handling, Handling & Use of Flammable Liquids, Noise & Vibration, Driving Safely.
